

Math1090 Approved Calculators

Here's the list of approved calculators that you can use during quizzes and exams. If you are looking to purchase a calculator, the highlighted ones display math expressions as you would write on paper. (The non-highlighted ones require the use of more parentheses.)

- TI-30Xa Scientific Calculator, • **TI-30XS MultiView Scientific Calculator** • TI-30X IIS Scientific Calculator
- **TI-34 Multiview Scientific Calculator**

- **Casio fx 300 ES PLUS2** • **Casio fx-300ESPLS2** • Casio fx-300MS • **Casio fx-305 ES Plus** • Casio fx 260

If the scientific calculator you have is not on this list, please check with your instructor to see if it can be added to the approved list. Programmable, graphing, financial, internet-connected, phone, or computer calculators will not be allowed on exams.

Please note that you can check out calculators for free with your student id card at the Knowledge Commons Desk in the Marriott Library and at the Math Tutoring Center. However, this is subject to availability and they frequently run out (particularly later in the semester).
