

MATHEMATICS 1040

Introduction to Statistics and Probability

Textbook: Elementary Statistics: Picturing the World, by Ron Larson and Betsy Farber, 6th edition

A. The least expensive option for the book is to buy it through the Inclusive Access Program. An email will go out to math 1040 students prior to the first day of class with information on what Inclusive Access is and instructions on how to access their digital course materials. If the student decides they don't want the instant access to the course materials they will have the option to OPT OUT and will be refunded accordingly. Students still need to pay for the course materials cost along with their tuition, but once they OPT OUT during the first two weeks of class they will receive a full refund of the course material cost. They will then be responsible for obtaining their own course material/textbook for that course.

Through the Inclusive Access Program, students will receive a digital copy of the book. The students' cost for math 1040 access is \$41.80.

B. If a student wishes to order a hard copy of the book, they can talk to Shane Girton (U of U Bookstore) and a copy of the book can be special ordered. The new copy of the custom version for the U of U is \$110.

C. A student can choose to rent the book (180-day rental) or buy eTextbook at the following website:

<https://www.vitalsource.com/products/elementary-statistics-ron-larson-v9780321900845>

The current cost for math 1040 book is \$44.99 through this website.

D. The book can be rented/purchased through a variety of vendors, such as eBay, Amazon or similar websites. The cost is usually more than the Inclusive Access cost and it changes daily.

NOTE: Before you purchase the textbook please make sure that Math 1040 is a good fit for you and you are not planning to withdraw from the class. Some vendors will not allow you to return the book for a refund if you decide to withdraw. Please read all policies associated with the return/refund before you purchase and pay for the book.
