u-substitution for integrals

Which of these is done correctly (circle all that are correct)? And, if it's not correct, point out the error.

Let's start with this integral that needs u-sub.

$$\int_{\frac{\pi}{8}}^{\frac{\pi}{4}} 12 \sin^2(4x + \pi) \cos(4x + \pi) dx$$

$$u = \sin(4x + \pi)$$

$$du = 4 \cos(4x + \pi) dx$$

$$3 du = 12 \cos(4x + \pi) dx$$
