

Math2210 Final Review Problems Kelly MacArthur

From your book:

Chapter 14 Review Sample Test Problems (pg 774)

#1, 2, 4, 5, 6, 8, 9, 12, 13

(Also, you can redo all the midterm review problems assigned previously.)

From the "Final Review Extra Problems":

(These problems are from a different calculus book.)

Exercises pg 646-647 #1, 2, 3, 20, 21

Exercises pg 714-716 #1-13 all, 17-27 odd, 28-36 all, 39-45 all,
51-60 all

Exercises pg 752-753 #1, 2, 5, 7

Exercises pg 818-819 #1-11 odd, 15, 16, 17-21 all, 23, 24, 27,
28, 31, 32

Exercises pg 882-883 #1-14 all, 19, 23, 24, 30

The test covers everything we've covered in this class. I can guarantee that there will be 3-4 problems on the test that cover the last few sections of chapter 14, since that hasn't yet been covered on a midterm. The rest of the exam will focus on the other stuff. If you want a good idea of what I think is important from the first 3 weeks, review your midterms and quizzes. :)

You can bring an 8.5 x 11 inch paper with notes (on both sides, if you want) to use as a reference. No calculator is necessary for this exam.
